

2019-2020 Current SCA Traffic Flow/Parking

The SCA parking chart shows the traffic flow for drop off and pick up.

If you are dropping off your student and allowing them to walk into school by themselves, please use designated drop off spot (Green Circle) area. Do not take too long to drop off in this spot, please be sensitive to other parents that are behind you in line. If you are parking (park in the center parking area) coming into the building with your student, please do your best to park in a spot that will not require you to backup. Please pull forward when leaving the parking space and follow the exit flow. The most significant danger we have for students who are walking from the parking lot is a car backing up. Thank you for your understanding.
